目录 Content

01/ 关于时间
About Time

02/ 关于光速
About Light Speed

03/ 关于引力
About Gravitation

04/ 关于物质
About matter

关于时间 About Time

- 时间并不存在，只是运动带来的错觉。
- Time does not exist, it is just an illusion caused by movement.

关于光速 About Light Speed

- 光速不可超越，任何物质以光速运动就会转变成光。
- The speed of light cannot be surpassed, Any matter will transform into light when it moves at the speed of light.

关于引力 About Gravitation

- 光以引力和能量的形式交替存在。
- Light exists alternately between the form of gravity and energy.

关于物质 About matter

- 物质的基本组成方式是两个光子的相互纠缠运动（ $E=MC^2$ ）。
- The basic composition of matter is the entangled motion of two photons.

谢谢!

Thanks
